

Spice Technologies has been in the ESD industry for over 10 years and has great expertise in providing solution for static elimination and control.

Our ESD PVC floor mat is a homogenous static floor covering, available in both dissipative and conductive. ESD & Cleanroom flooring is an advanced technical flooring system designed to control static discharge in sensitive area.

Key specialty of our ESD flooring

- Excellent wear resistance and easy cleaning.
- Conductive material is distributed evenly in entire tile so that it has permanent conductivity.
- Uniform gauge and color maintenance.
- Suitable for heavy load handling.
- 5 years warranty for ESD properties.

We provide installation and testing of ESD facility and the testing done by TR53 Certified professional.

Our mats meets the requirements of all the commonly used ESD Standards, such as..

- ❑ IEC 61340-5-1/2, method method S7.1-1994
- ❑ IEC 1340-4-1
- ❑ ANSI/ESD-S20.20

Applications of use

Electronic Laboratories

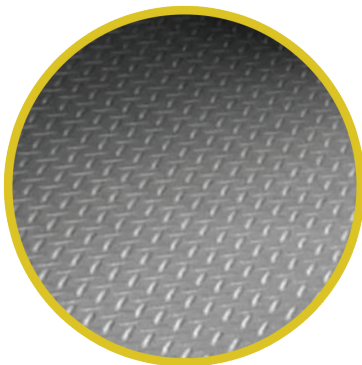

Assembling Unit

Service Center

Defence & Military Base

Testing Area
