

## Description

- Portable Meter for Testing of Electrostatic Fields
- Measures surface voltage and polarity on objects up to  $\pm 19.99$  kV at a distance of 1 inch
- Switch Selectable Measurement Ranges
- Provides readings from 0 to  $\pm 1.999$  kV and 0 to  $\pm 19.99$  kV
- Chopper-Stabilized Probe Technology
- Allows for use in ionized environments
- Durable Dissipative Housing Design with Membrane Switches
- Protects meter from physical damage and minimizes wear
- LED Range Finder
- Red ranging lights help operator to place the meter at the correct distance from the object being measured.
- Hold Button
- Allows the measurements to be retained for easy reading and extends battery life.
- NIST Calibrated with Certificate Included.
