

SPECIFICATIONS

Size: 26"*45"
Thickness: 40um
Color: blue
Any other thickness and sizes, color can be customized.
Package: 30layer/sheet,10sheet/box, 5box/carton
Function: anti bacterial, antistatic sticky mat are available if needed.

- 1.It is composed of easy to peel-off
 - 2.It can effectively capture 99% all foot-borne and wheel-borne particulates
- Sticky Mat is produced using the most advanced technology for adhesive-coated contamination control mats. Formulated and developed to meet the stringent cleanroom particulate specifications. Used on entryways, walkways, traffic areas where particle contamination is to be controlled.
- It is composed of easy to peel-off, disposable sticky mat layers that can effectively capture 99% all foot-borne and wheel-borne particulates from entering the controlled working environment.
- Each mat is composed of multiple layers of polyethylene films coated with custom high tack adhesive laminated together into a stack. When the top layer becomes sufficiently soiled simply peel it off to expose the next clean sheet of sticky mat. It utilizes a water-based acrylic adhesive, which has a pH of 7-8 and doesn't contain benzoic acid. Certified by RoHS to be free from heavy metals and hazardous chemicals.

Product Parameters

Material	polyethylene (LDPE) water-binder (environmental protection)
Thickness	40um
Color: blue	blue
Normal specifications	26 "45" (can be) in accordance with the requirements of client
Structure	30 pages per piece (solid page for page 32)
Function	anti bacterial, antistatic sticky mat are available
Ability of sticky	99.9%
The heat resistance	60 degrees
Shelf life	Eight months
Specification	carton include 8 or 10box
