

FEATURES

- Testing mode:
 - Individual test: test the wear status of wrist strap, single foot or both feet (foot ring, conducting shoes and anti-static shoes) separately.
 - Comprehensive test: test the wear status of wrist strap and both feet (foot ring, conducting shoes and anti-static shoes) simultaneously.
- With door control system signal: the tester can output a signal to control the system and prevent people from entering anti-static places freely.
- Combo tester uses mini current to test, resulting in stable and accurate.
- Low voltage alarm function: the alarm indicator will flash if low battery.
- Extended range of foot ring: 100KΩ-1GΩ.

SPECIFICATIONS

Power supply	9V battery or AC coupling adapter(DC 12V)
Output	9 indicators Sound signal, touch-point output and low voltage alarm output
Touch-point switch output	Switch current ≤ 130mA, touch-point resistance < 30Ω Test PASS: touch-point close Test FAIL: Touch-point open
Accuracy	Wrist strap ±10% Footwear ±10%(100KΩ); ±20%(100MΩ); ±30%(1GΩ)
Dimensions	160mm*100mm*40mm
Weight	About 12.0kg
