

Description

ESD plastic container is made of PP compound material with some high quality conductive fiber. It has antistatic function. It is used for electronics factory to store waste etc. with lid and wheels, easy to move.

Specifications

Material	PP compound with conductive fiber
Type	Injection mold
Color	Black
Size	760*600*1080mm
Volume	240L
Accessories	Lid, Wheels
Resistance Value	10 E5-10 E10 ohm, Tested by Surface Resistance Meter
