

Description

Micro fiber clean room wiper is continuous textile made from 100% polyester filament by special treatment. It is designed to be used for Class 100 clean room. The particles qty, Harmful ions and soluble materials are all controlled in a lower range. Our 4009 Micro fiber wiper is washed and packed in Class 100 clean room.

Property

- Continuous textile made from 100% polyester filament
- Very uniform mesh textile structure
- Vacuumed Package, bulk packing is available
- Wash and pack in Class 100 clean room
- Laser sealing side
- Stable and Strict Quality Control

Advantage

- Strong capability of solvent resistance
- Lower particles and fiber divergence
- Good fluid absorption, used for wet wipe
- Economic, durable for use

Recommend to be used in below environment:

Class 100 clean room to wipe products, including semi-conductor, LCD, IC, opto-electronics industries and other electronics industries to absorb the liquid in dust free environment. Surface polishing and cleaning for rely, connector and switch etc.
